YLM 國際領導品牌

AN INTERNATIONAL BRAND NAME

全球最大彎管機製造廠 冷彎技術深耕四十多年

穎漢科技股份有限公司設計與製造CNC、NC及傳統型彎管機，已有四十多年的經驗累積。並且為客戶提供末端成型機、切管機、自動送料機等週邊設備。穎漢彎管機以YLM品牌行銷全球五大洲，銷售國家高達30多國，其秉持優異的機械性能配合人性化的操控軟體，穎漢彎管機已成功的塑造彎管機的領導品牌。歷經四十多年的辛勤耕耘與成長茁壯，穎漢將持續精進，以確保競爭優勢。

The World's Largest Tube Bender Manufacturing Dedicated to Tube Cold Bending for Over 40 Years

Ying Han Technology has more than 40 years of accumulated experience in design and manufacture of CNC, NC and conventional tube and pipe bending machines. Moreover, Ying Han also offers a wide range of peripheral equipment, such as cutting machine, end forming machine and auto loader, etc. Ying Han tube benders are marketed on five continents under the "YLM" brand, with over 30 countries. Thanks to outstanding machine performance in combination with humanized control software, Ying Han tube bender has successfully established a leading brand in this sector. With over 40 years of hard cultivation and the company's growth, Ying Han will keep striving hard to ensure its competitive edge.

自主開發 智慧型控制軟體

穎漢科技擁有卓越的軟體程式開發能力，早在1995年，穎漢程式開發人員就已領先同業，成功研發出亞洲第一套PC-BASE控制的全自動彎管機。穎漢可依客戶特殊製程需求而研發客製化程式系統，並配合YLM機電整合能力，進而滿足客戶的生產需求。當工業4.0的時代來臨，穎漢科技也同時致力於智慧型工作站之規劃、設計、製造，以幫助客戶降低生產成本，節省人力，提升產品品質與生產效率，達成更高的競爭力。

In-House Developed Intelligent Control Software

At Ying Han, we have outstanding software program development capabilities. In 1995, Ying Han program development personnel successfully developed the first Asian, pc-based controller for use on a fully automatic tube bender. Upon customer request, Ying Han can develop a customized program system according to customer's specific process requirements. This combined with YLM's outstanding mechanical and electrical integration capabilities, which in turn will better meet customer's production needs. As of today we are in the era of industry 4.0, Ying Han is also dedicated to the planning, design and manufacturing of smart automation work cell. This will help our customers to lower production costs and save labor, thereby upgrading product quality and production efficiency and leading to a higher competitive edge.

主要產品 Main Products

1 CNC全電型彎管機
CNC electric tube bending machines

2 CNC全電型左右旋彎管機
CNC electric R&L tube bending machines

3 CNC/NC/CR油電型彎管機
CNC/NC/CR hybrid tube bending machines

4 週邊設備
(末端成型機/切管機/送料機)
Auxiliary equipment
(End forming / Cutting / Feeding machine)

5 機器人
Robot

6 彎線機
Wire bender

7 整廠設備-智能化工作站
Whole plant equipment - Smart automation work cells

8 雷射切割機
Laser tube cutting machine

9 加工中心機
Machining centers

OUTSTANDING DESIGN OPTIMAL OPERATION PERFORMANCE

精湛設計 最佳操控性

CNC油電彎管機

加工力道強勁、應用廣泛

穎漢的全自動CNC油電彎管機，採用伺服馬達驅動及完善的油路系統規劃，確保彎管品質優異。高度彈性的機台設計，可依據客戶之特殊工件，開發客製化模具。此系統CNC油電機型，配備有簡單易學的控制器。生產性能優異，可徹底滿足各種產業的應用需求，例如：汽機車排氣管零件、運動器材、鍋爐、造船、大型運輸車輛、化工、電廠、柴油引擎、建築、航空、家具、空調管路、剎車油管、衛浴設備等等。

油電彎管機特性

1. 此系列機種均採用油壓閥積體迴路，動作個別控制，可延長油壓零件使用壽命。
2. 大型機種裝有手動可調式數位流量調節閥，可控制進彎之速度。
3. 伺服進彎定位精準，使彎管品質良好。

輔推功能

為了避免小曲半徑加工時之拉斷或破裂問題，穎漢彎管機採用正向輔助推送管件，搭配側向輔推機構(導模輔推)，可將管件拉斷或破裂降到最低程度。輔助推力可配合彎曲速度，材料特性、彎曲角度作調整。以達到最佳生產效率及彎管品質。

CNC HYBRID TUBE BENDING MACHINE

Extra Powerful Machining Capacity. Widespread Applications.

The Fully Automatic CNC Hybrid Tube Bending Machine from Ying Han is driven by servo motor in combination with well planned hydraulic circuit, ensuring outstanding tube bending quality. With the highly flexible design capability, customized dies are being developed to suit customers' special workpieces. The series of CNC hybrid tube bender is equipped with a user-friendly controller. The superb production performance allows the machine to thoroughly satisfy application requirements for a wide range of industries, such as sports equipment, boiler, large transport vehicles, chemical engineering, power plant, diesel engine, exhaust pipe for automotive and motorcycle, architecture, aircraft, furniture, air conditioner piping, brake piping and bathroom equipment, etc.

Features of Hybrid Tube Bender

1. The series of machine employs hydraulic valves and integrated circuits to control bending motion individually, which will extend the service life of the hydraulic parts.
2. Large bending machine is equipped with a manually adjusted digital flow regulation valve to control the speed of bending motion.
3. Servo drive provides high accuracy in bending positioning, that ensures high quality bending.

Boosting Function

In order to prevent tube from snapping or cracking in small radius bending operations, Ying Han tube bender employs a rear booster to push tube. This combined with side boosting (pressure die boosting) to minimize the problem of tube snapping or cracking. Boosting force can be adjusted in accordance with bending speed, material properties and bending angle. This will lead to optimal production efficiency and bending quality.

PC-Base 控制器

人性化操控 易學、易懂、易操作

穎漢科技自行開發之彎管控制軟體，並搭配Windows作業系統。依據客戶要求的客製化機械功能，電腦軟體也可隨之量身訂作。穎漢秉持優異的機電整合能力，可提供更符合您生產需求的設備，達成生產效率最佳化的目標。

1. 多國語系介面 (中、英、日...等)。
2. 3D模擬系統 (有手動模擬及干涉判斷)。
3. 可搭配3D掃描儀 (有ROMER、FARO、AICON)。
4. XYZ轉YBC的功能。
5. 管件反彈系數的計算。
6. PC-BASE 控制系統，圖形化人機介面，畫面切換快速，操作簡易。
7. 全新3D管件預覽功能，即時顯示3D管件模型，方便立即修正。
8. 工件參數與Y, B, C資料輸入時，具自動修正與防錯判斷。
9. 管件工作計數與倒數計數功能。
10. 不同彎曲半徑多次彎管、精度高、速度快、省人工。
11. 具有自動檢測錯誤及故障功能。當異常動作或危險情況存在時，機器立即停機，並發出異警。
12. 異常訊息顯示，方便故障排除。

1. 自動功能設定
 2. 切斷功能設定 (選配)
 3. 操作權限設定
 4. 管件預覽功能
 5. 管件XYZ座標轉YBC彎管流程
 6. 3D模擬干涉判斷功能
1. Auto mode function setting
 2. Cut-off function setting (optional)
 3. Operation rights setting
 4. 3D simulation function
 5. Converting X,Y,Z coordinates of tube to Y,B,C bending process
 6. 3D simulation and interference judgment function

PC-Based Controller

Humanized Operation Easy to Learn, Understand and operate

The tube bending control software is self-developed by Ying Han Technology in combination with windows operation system. The computer software can also be tailor designed according to customers' requirements for customized machine functions. Based on Ying Han's outstanding capability in mechanical and electrical integration, we are able to offer more appropriate equipment to meet your production needs.

1. Multi-language display (Chinese, English and Japanese, etc.)
2. 3D simulation system (With manual simulation and interference judgment)
3. Available to use together with a 3D scanner (such as ROMER, FARO, AICON)
4. Function of converting XYZ to YBC.
5. Calculation of tube springback coefficient.
6. The PC-based controller features graphic human-machine interface, quick change display and easy operation.
7. All new 3D tube preview function provides instant display of 3D tube model, allowing for immediate modification.
8. When entering workpiece parameters and Y, B, C data, the controller provides automatic modification and error-prevention judgement.
9. Tube production count and countdown functions.
10. Multiple bending for various bending radii features high accuracy, fast operation and labor saving.
11. With automatic detection function for error and trouble. In case a malfunction or danger exists, the machine stops immediately and alarm occurs.
12. Error message display makes it convenient for trouble shooting.

CNC-08

適用產業

- 汽車剎車
- 供油管路
- 空調管路
- 電熱管

特性

- 無油壓
- 拉彎
- 3軸伺服控制
- 3D模擬
- 適合使用冷氣工業

Suitable Industries

- Automotive brake piping
- Fuel piping
- Air conditioner piping
- Heater

Features

- Zero hydraulic
- Draw-bending
- 3 axes servo motor controlled
- 3D simulation
- The best machine for air conditioner industry

最大彎曲半徑	Max. bending CLR	250 mm

手動伺服操控，可設定絕對與相對位置運動，展現精準快速特色。

Manual servo control allows for setting motions with absolute and relative position, thus exhibiting high accuracy and high speed.

支撐機構 Tube support

束頭設計 Tube collet

多層模模具設計 Multi-stack die

曲手機構 Crank arm mechanism

外爪機構 OD collet mechanism

通蕊機構 Mandrel mechanism

CNC-130

適用產業	特性	Suitable Industries	Features
<ul style="list-style-type: none"> ● 運動器材 ● 鍋爐 ● 造船 ● 大型運輸車輛 ● 化工 ● 電廠 ● 柴油引擎 	<ul style="list-style-type: none"> ● 混合動力 ● 推/拉彎功能 ● 3D模擬 ● 全機潤滑 ● 通蕊打油系統 ● 通蕊桿斷裂偵測 (選配) ● 通蕊球裂偵測 (選配) ● 伺服進彎/油壓進彎機型 ● 末段輔推功能(選配) 	<ul style="list-style-type: none"> ● Exercise equipment ● Boiler ● Shipbuilding ● Heavy transportation vehicle ● Chemical engineering ● Power plant ● Diesel engine 	<ul style="list-style-type: none"> ● Hybrid model ● Push / draw bending ● 3D simulation ● Machine auto lubrication system ● Mandrel lubrication system ● Mandrel rod break detection (opt.) ● Mandrel ball break detection (opt.) ● Servo bending / hydraulic bending ● Tube boosting (opt.)

主規格	Main Specifications	
管材 - 鐵管	Material - Mild steel	CLR 1.5D
最大彎曲管徑	Max. tube O.D.	Ø130 mm
最大管壁厚度	Max. tube wall thickness	3.4 mm
最大彎曲半徑	Max. bending CLR	450 mm

油壓進彎機型
Hyd. bending

內爪機構 ID collet mechanism

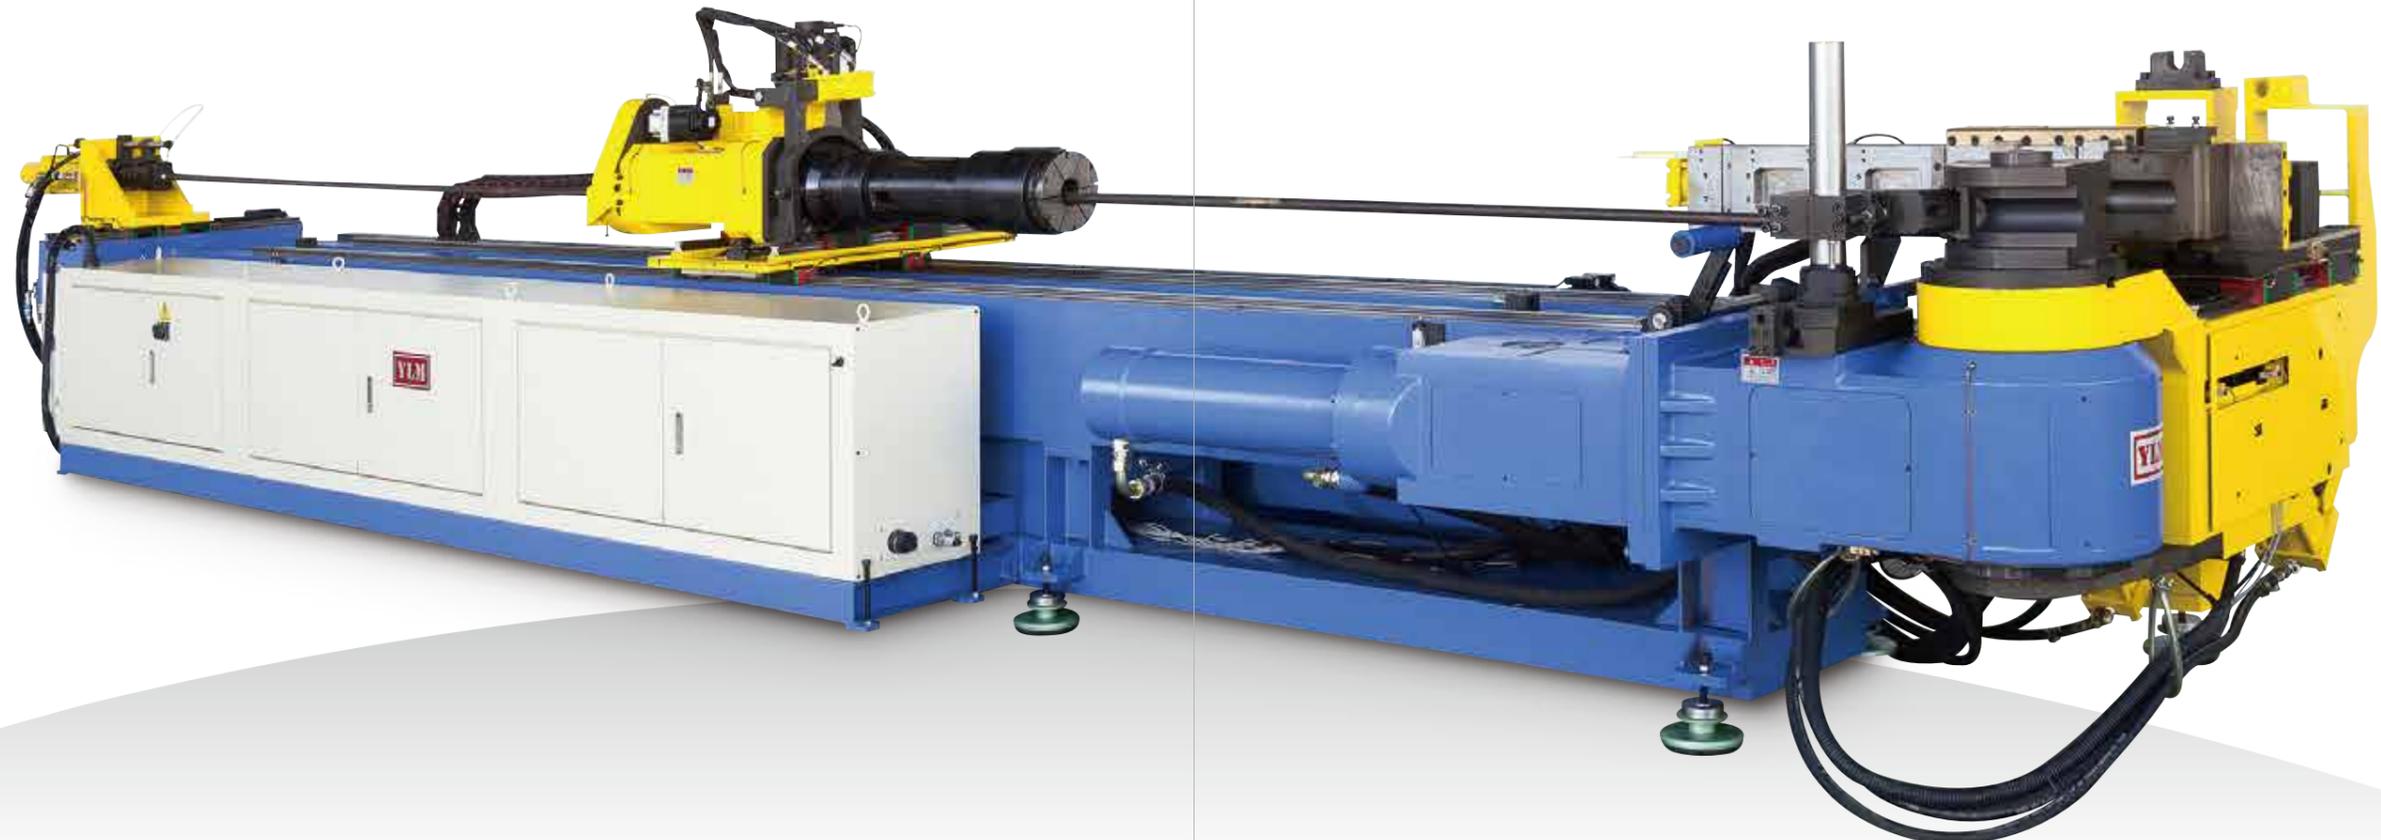

大容量冷卻循環系統，使機器運轉更順暢、更穩定。
Big capacity circulated cooling system makes machine running smoother and more stable.

CNC-160

適用產業	特性	Suitable Industries	Features
<ul style="list-style-type: none"> ● 運動器材 ● 鍋爐 ● 造船 ● 大型運輸車輛 ● 化工 ● 電廠 ● 柴油引擎 	<ul style="list-style-type: none"> ● 混合動力 ● 油壓進彎機型 ● 推/拉彎功能 ● 3D模擬 ● 全機潤滑 ● 通蕊打油系統 ● 通蕊桿斷裂偵測 (選配) ● 通蕊球裂偵測 (選配) ● 末段輔推功能(選配) ● 中大型管件專用 	<ul style="list-style-type: none"> ● Exercise equipment ● Boiler ● Shipbuilding ● Heavy transportation vehicle ● Chemical engineering ● Power plant ● Diesel engine 	<ul style="list-style-type: none"> ● Hybrid model ● High performance hydraulic bending ● Push / draw bending ● 3D simulation ● Machine auto lubrication system ● Mandrel lubrication system ● Mandrel rod break detection (opt.) ● Mandrel ball break detection (opt.) ● Tube boosting (opt.) ● Applicable for medium and large sized tubes

主規格	Main Specifications	
管材 - 鐵管	Material - Mild steel	CLR 1.5D
最大彎曲管徑	Max. tube O.D.	Ø160 mm
最大管壁厚度	Max. tube wall thickness	3.2 mm
最大彎曲半徑	Max. bending CLR	400 mm

車頭機構 Bending head mechanism

送料機構 Feeding mechanism

通蕊打油機構 Mandrel lubricator system

通蕊機構 Mandrel mechanism

● 本公司機台不斷研發創新，機台如有設計變更恕不另行通知。
The above machine specification is subject to change without previous notice due to the continuous improvement of R&D.

● *: CNC-100S2, CNC-130S2及CNC-160S2為油壓進彎機型
*: CNC-100S2, CNC-130S2 and CNC-160S2 are by bending hydraulic models.

標準配件

機械標準功能:

- 全機自動潤滑 (CNC-65以上)
- 通蕊打油 (CNC-38以上)
- 後導模機構 (CNC-38以上)
- 3D模擬功能

選購配件

機械選購功能:

- 推彎功能
- 打孔功能
- 拆合模功能
- 掃描器
- 柵欄
- 配重汽缸 (CNC-25以下)
- 安全地毯
- 光柵
- 焊道偵測功能
- 切斷功能
- 通蕊桿斷裂偵測
- 通蕊球斷裂偵測
- 末段輔推功能
- 快速換模
- 冷卻系統 (風冷)

Standard Accessories

Standard Functions of Machine

- Machine automatic lubrication (models over CNC-65)
- Mandrel lubrication (models over CNC-38)
- Wiper die (mechanism over CNC-38)
- 3D simulation for tube bending

Optional Accessories

Optional Functions of Machine

- Push bending
- Hole punching function
- Split die system
- Scanner
- Fence
- Counter-balancing air cylinder (models under CNC-25)
- Safety mat
- Light curtain
- Weld seam detection function
- Cut-off function
- Mandrel rod break detection
- Mandrel ball break detection
- Tube boosting
- Quick tooling change
- Cooling system (air cooling)

模具介紹 Mold Description
